

# U CAPPERS LOW STARCH HORSE PELLETS

## Feeding Directions

Feed up to 0.5 pound to 0.75 pounds per 100 pounds of the horse's body weight daily, with liberal amounts of quality forage. Most pleasure horses will stay in top condition on three to six pounds per day. Depending on size and weight, increase by one to five pounds per horse when horse's activity level increases.

This feed is formulated for horses one year of age or older in maintenance or moderate work. A safer energy formula which uses a higher fiber controlled starch approach which contains added fat. This approach can help reduce the risk of nutritionally related problems that can result from high starch diets.

## CAUTION

**THIS FEED CONTAINS ADDED LEVELS OF COPPER. DO NOT FEED TO SHEEP.**
