

# KRUSE'S CANINE ADVANTAGE

Kruse's Canine Advantage is an appetizing, chicken based dog food with the added benefits of ground rice and lamb meal. Our formulation is an excellent alternative for dogs whom may be sensitive to having corn or soy in their diet. The real "advantage" is wholesome balanced nutrition without the excessive levels of calcium and phosphorus often found in meat based diets. High quality poultry fat provides higher levels of Linoleic Acid which may help dogs with skin and coat problems. Kruse's Canine Advantage is formulated to meet the nutritional levels established by the Association of American Feed Control Officials (AAFCO) dog food nutrient profiles for all life stages.

## Feeding Directions

Weight of Dog	8 oz. measuring cup
5 Lbs	1 Cup
15 Lbs	1-1½ Cups
30 Lbs	1½-2 Cups
50 Lbs	2½-3 Cups
75 Lbs	3-3¾ Cups
100 Lbs	4-5½ Cups

Feed dry or moisten with one part liquid to six cups dry food. Stir slightly and feed at once. Do not leave moistened food standing for long periods of time.

- Feed pregnant bitches at least 50% more during the last three weeks of pregnancy.
- Feed nursing bitches two to three times as much food as suggested.
- Puppies will start eating solid food at about four weeks of age. Kruse's Canine Advantage should be moistened at the rate of one part liquid to two parts food. Puppies require about twice as much as adult dogs and should be fed three to four times daily until six months old, and then twice daily until nine months to one year old. Discard moistened food after 20-30 minutes. You may replace moistened food with dry food for free choice feeding until the next moistened meal. Always provide plenty of fresh, clean water.
