

VERDEMONT SWINE X-CELL-RATE 19% PLT

For control of Swine Dysentery and the control of Porcine Proliferative Enteropathy (Ileitis) caused by Lawsonia Intracellularis. Feed as the sole ration.

ACTIVE DRUG INGREDIENT

Lincomycin 40 g/ton

Feeding Directions

Supply this ration, free choice, to swine. Provide fresh, clean water at all times.

CAUTION

Occasionally, swine fed Lincomycin may, within the first 2 days after the onset of treatment, develop diarrhea and/or swelling of the anus. On rare occasions, some pigs may show reddening of the skin and irritable behavior. These conditions have been self-correcting within 5-8 days without discontinuing the Lincomycin treatment. Do not allow rabbits, hamsters, guinea pigs, horses or ruminants access to feeds containing Lincomycin. Ingestion by these species may result in severe gastrointestinal effects. Not to be fed to swine that weigh more than 250 lb.

LIMITATIONS FOR USE

For use in animals or on premises with a history of swine dysentery, but where symptoms have not yet occurred.

CAUTION

This feed contains added levels of copper. Do not feed to sheep.
